PLEASE READ ENTIRE LABEL AND MATERIAL SAFETY DATA SHEET BEFORE USE.

Multiple is a highly concentrated suspension formulation containing; manganese, copper, magnesium and zinc. This blend has been developed for the prevention and correction of nutrient deficiencies in cereals and other crops.

HAZARD CLASSIFICATION: 6.1E, 6.3B, 6.4A, 9.1B

WARNING: This product should not be swallowed or inhaled. May cause skin and eye irritation. Avoid contact with skin or eyes.

FIRST AID: If swallowed DO NOT induce vomiting. For advice contact the National Poisons Centre 0800 POISON (0800 764 766) or a doctor immediately. If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water. If splashed in eyes, wash out immediately with water.

ECOTOXIC: Toxic to fish/aquatic organisms with long lasting effects. Avoid contamination of any water supply with this product or empty container.

PERSONAL PROTECTION: Avoid skin and eye contact and inhalation of spray mist. When mixing or applying wear waterproof gloves, eye protection, boots and overalls. DO NOT eat, drink or smoke while using. Wash splashes of concentrate from skin immediately. Remove protective clothing and wash hands and face thoroughly before meals and after work. Wash protective clothing daily after work.

STORAGE: Store in original container, tightly closed and in a dry, cool area away from direct sunlight and foodstuffs. Protect from frost, store above 5°C.

DISPOSAL: Triple rinse empty container and add rinsate to the spray tank. If recycling, discard cap and deliver clean container to an Agrecovery depot. Alternatively crush and bury in a suitable landfill. Dispose of product only by using according to the label, or at an approved disposal facility.

MATERIAL SAFETY DATA SHEET: Additional information is listed in the MSDS available from Zelam Ltd or www.zelam.com.

Approved pursuant to the HSNO Act 1996.
Fertilisers (Subsidiary Hazard) Group Standard HSR002571.
See www.epa.govt.nz for controls.

APPLICATION RATES AND TIMINGS:

Cereals:
Apply 1 litre in 200 litres of water/ha. Repeat if deficiency is severe.

Timing of applications:
Headland Multiple can be applied to crops whenever deficiency is observed or expected, or as a routine maintenance treatment. Applications may commence after the three-leaf stage in cereals, and in other crops when sufficient foliage has developed to absorb the spray.

Autumn sown crops will benefit from an application before the onset of winter.
Do not apply more than 3 litres/ha per crop per season.
Do not apply in less than 200 litres of water/ha.
Best results will be obtained when Headland Multiple is applied during the early morning or evening when moisture is present in the plant.
Do not apply in extremes of temperature, very bright sunlight or when the crop is under drought or other stress.
The addition of Headland Guard 2000 at 0.1% of water volume to improve spray retention and rainfastness.

MIXING AND APPLICATION: Shake the container well before opening and use. Half fill the spray tank with clean water, begin agitation and add the required quantity of Headland Multiple. Add the rest of the water and apply without delay.

COMPATIBILITY: Headland Multiple is compatible with many spray applied agricultural chemicals. Consult your supplier for the latest information.

NOTICE TO BUYER: The manufacturer and vendors of Headland Multiple warrant the formulation to contain the specified active ingredients within accepted tolerance but make no warranty of any kind on the uses of material and accept no responsibility, whether the material is used in accordance with the label directions or not.
